

Exploring the future of Higher Education Quality: the impact of smart technologies and internationalization on the education quality system

Guidelines for submitting Conference papers:

The Conference papers include:

- Research Title
- Name(s) of researcher(s)
- Theme and keyword list
- Corresponding author
- Conference paper outline

Abstract

1. Introduction
2. Literature review
3. Research method
4. Results and discussion
5. Conclusion
6. Acknowledgments: Thanks and Appreciation
7. References

Researchers' brief biographies and photos

According to the sample form below

Example of a title: "Developing the Higher Education Quality System: Institutional, Local and International Dimensions"

(Center, Bold, 16pt)

The title of the article should consist of as few words as possible that accurately describe the content of the paper. The title should be concise, informative, and no more than 12 words in length. Headings are often used in information retrieval systems.

Name of the first researcher 1, the second researcher 2, the third researcher 3, etc.

(12 points, Center)

1 Title of the first researcher: university, center, country (10 points)

2 Title of the second researcher

3 Title of the third researcher

etc.

Track and list of keywords (10 points):

The Chosen Track

Keywords: first keyword, second keyword, third keyword, fourth keyword, etc.

Selecting a track and keyword list provides the opportunity to add 5 to 7 keywords, used by indexing and abstracting services, in addition to those already in the title. An improperly titled paper may not reach its intended audience, so be specific.

Corresponding author (10 points):

Full Name

Address, country, email

Abstract (12 points)

A well-prepared abstract enables the reader to quickly and accurately identify the main content of a document to determine its relevance to their interests. The abstract should be informative and fully self-explanatory, clearly state the problem, proposed approach or solution, and indicate key findings and conclusions. The abstract should be between 100 and 200 words in length. References should be avoided, but if necessary, cite the author(s) and year(s). Standard terminology should be used, non-standard or uncommon abbreviations should be avoided, but if necessary, they should be specified at their first mention in the abstract.

1. Introduction (12 points)

The main text format is flat columns from left to right on A4 paper. The margin from the right and the top is 2 cm, and the left and the bottom are 2.5 cm. The manuscript is typed in Microsoft Word, Single spaced, Calibri 12 pts, 16 pages max.

The introduction section should provide the following

- 1) a clear background*
- 2) a clear statement of the problem*
- 3) the proposed approach or solution*
- 4) the new value of the research (within 3-6 paragraphs).*

It should be understandable to peers from a wide range of scientific disciplines.

2. Literature review (12 points)

This section includes an analysis of the relevant literature on the topic. References are cited in APA Style, for example (Badran, 2022). Terms in languages other than English are written in italics.

3. Research method (12 points)

This section describes the research steps. Explain the chronology of the research, including the research design, procedures, and how to test and obtain data. The description of the research path must be supported by references so that the explanation can be accepted scientifically. Correct citations must be made from other works to avoid plagiarism.

The text of the paper may be divided into sections, each with a separate title and numbered, respectively. Section or subsection headings should be written on a separate line; for example,

1. Introduction

2. research method

2.1 Subsection 1

2.2 Subsection 2

Any subsection can be divided into other subsections

2.2.1 Subsection 1

2.2.2 Subsection 2

4. Results and discussion (12 points)

In this section, the research results are explained, and at the same time, a comprehensive discussion is presented. Results can be presented in forms, graphs, tables, and more. The discussion can be conducted in several sub-sections.

5. Conclusion (12 points)

It provides a statement of what is expected, as stated in the “Introduction” section, which can eventually lead to the discussion and the intended results; furthermore, the possibility of developing the research findings and the prospects for applying further studies in the next phase (depending on the outcome and discussion) can also be added.

6. Acknowledgments (12 points)

Sponsor, Assistance, and Financial Support.

7. References (12 points)

The main references are international journals and conferences, in addition to websites. All references must be from the most relevant and up-to-date sources. References are written in APA Style. Please use a fixed format for references.

Example:

1. Badran, Adnan (2022), From the First Centennial to the Second Centennial: Education Benefits and Challenges, Education and the Future Book, National Center for Curriculum Development, Amman, Jordan.

Researchers' biographies (12 points)

A summary of the researchers' biography, which should not exceed one page.

Photo of the First Author	Name, brief Biography
Photo of the second Author	Name, brief Biography
